

Software Link Analysis

Network analysis provides insight into expected performance and potentially troublesome sites. Report includes link diagrams, network design and hardware recommendations.

Project Proposals

Ideal for city/utility board and council reviews, our proposals provide a general outline of the project scope, action plan, expected outcome, areas of attention, and a general overview of radio theory.

On-site Radio Path Studies

On-site testing is the only way to assess the feasibility of radio links in your new or existing system. Utilize our experienced technicians and receive peace of mind on hardware decisions.

Elevate your Connectivity

Technical Services offered by Elevate Wireless

On-site Commissioning

Our professional staff will work with you to maximize the performance of your wireless network and ensure optimal results. On-site training opportunities also available.

FCC Licensing Services

Take the stress out of FCC licensing and utilize our years of experience.

Remote & On-site Technical Support

Unlimited pre- & post-sale technical support available by phone or email. On-site technical support can also be commissioned when needed.
